Want to Make a Difference?

TAPT has scheduled our annul Christmas Party for 2022. Yes it is time to think of some ho ho. It is December 10 2022 at Chuck Cagle's home. Come on in by 6pm with your dirty Santa gift. Please bring something to dine on for you and me. The main dish will be Ham and Turkey. Plan your dish with care. PrimeTimers can be your worst Grinch. Set out your best outfit for the festive day. You know Santa is watching. See you all there to party hard and go home happy. Now just let us get through Thanksgiving first. Thank you all for a blessed year.

Some history of Oklahoma

The territories of Spain, France and Mexico all had land mass that would later become part of the Territory of Oklahoma.

It is believed that Oklahoma was first explored by the Spanish. Most likely, this might be disputed by the Indian heritage history.

The Territory of Oklahoma was open for settlement as an incorporated U.S. Territory on May 2, 1890, which lasted until November 16, 1907, when the area joined with Indian Territory with a new constitution and was admitted to the Union as the State of Oklahoma.

Oklahoma Territory began with the Indian Intercourse Act of 1831.

This U.S. Congress Act established land for Native Americans, known as Indian Territory, under the Indian Removal Act in exchange for territories east of the Mississippi.

Memory

I felt better after reading this.

Brains of older people are slow because they know so much. People do not decline mentally with age, it just takes them longer to recall facts because they have more information in their brains, scientists believe.

Much like a computer struggles as the hard drive gets full, so too, do humans take longer to access information when their brains are full.

Researchers say this slowing down process is not the same as cognitive decline. The human brain works slower in old age, said Dr. Michael Ramscar, but only because we have stored more information over time. The brains of older people do not get weak. On the contrary, they simply know more.

Also, older people often go to another room to get something and when they get there, they stand there wondering what they came for. It is not a memory problem. It is nature's way of making older people do more exercise. So there, and be sure to tell all of your friends.
